EDUCATION

National University of Computer and Emerging Sciences (NUCES, FAST)

Bachelor of Science in Computer Science

Karachi, Pakistan

2023 - 2027

WORK & LEADERSHIP EXPERIENCE

Dev Weekends

Software Development Fellowship

Remote
June 2025 - August 2025

- Enhanced problem-solving skills by completing 300+ LeetCode problems, improving algorithmic problem-solving and technical interview performance.
- Collaborated in a mentor-led program with 30+ DSA sessions and 12 engineering grind sessions (JavaScript, React, Node.js, system design).
- Contributed to open-source projects and capstone development, applying software engineering best practices in real-world scenarios.

Nexium

AI & Web Development Intern

Remote

July 2025

- Built and deployed 3+ full-stack AI-powered applications with end-to-end functionality
- Worked with Next.js, Supabase, MongoDB, ShadCN UI, Vercel, and n8n for AI workflows.
- Improved deployment reliability by implementing CI/CD pipelines, secure authentication, and database integrations, improving deployment reliability and production readiness.

PROJECTS

• Carpooling System

Developed a C-based carpooling system with ride offering, search, and route matching features. Implemented file handling, user-defined structures, and automated record cleanup for 45+ transport routes.

• Social Media Platform Simulator

Built a C++ console-based social media simulator with user authentication, posts, stories, likes, comments, and following features.

Applied OOP concepts including abstract classes, inheritance, and polymorphism; implemented file handling and password encryption for user data persistence.

• Matrix Calculator

Developed a matrix calculator in x86 Assembly Language using Irvine32 with menu-driven operations like addition, multiplication, and determinant calculation.

• Advanced Producer-Consumer Kernel Module

Developed a Linux kernel module implementing a priority-based producer-consumer system using kernel threads, semaphores, and spinlocks. Simulated interrupt handling and deferred work using IRQ and workqueues; enabled real-time configuration via sysfs and debugfs.

Certifications & Training

Aspire Institute - Organizational Leadership Program (*Aug 2025 – Oct 2025*)

Global leadership development program for first-generation leaders; completed a Harvard University–designed course on leadership, societal impact, trust-building, and digital transformation & AI.

Selected Certifications:

Google Prompt Engineering Specialization; Google AI Essentials; Deloitte Technology Job Simulation; AI Seekho (Google Cloud – AI & ML); C Programming Fundamentals & Structured Programming (UC Santa Cruz); Introduction to Psychology (Yale); Entrepreneurship 1 (UPenn); Getting Started with Git & GitHub (IBM)

SKILLS, ACTIVITIES & INTERESTS

Technical Skills: C/C++, Python, SQL, Linux, Bash, Assembly Language, HTML, CSS, JavaScript, React, Next.js, Supabase, MongoDB, ShadCN UI, TensorFlow, Keras, Scikit-learn, NumPy, Pandas, Git/GitHub, Jupyter notebooks

Extracurriculars: Head (Marketing) – Robotics and Automation Society; Co-Head (Graphic Design) – Robotics and Automation Society; Co-Head (Content) – Developer Student Club; Co-Head (Marketing) – FAST Entrepreneurship Society; Executive (Marketing) – ACM (Association for Computing Machinery)

Interests: Chess, Music, Graphic Design, Table Tennis, Cycling, Reading, Community Outreach
