Third-year BSCS student with strong foundations in computer networks, operating systems, and troubleshooting. Seeking an on-site IT role to support infrastructure, resolve technical issues, and ensure smooth system operations.

EDUCATION

National University of Computer and Emerging Sciences (NUCES, FAST) <i>Bachelor of Science in Computer Science</i> Relevant Coursework: Computer Networks, Operating Systems, Data Structures, Database Systems	Karachi, Pakistan 2023 – 2027
---	---

WORK & LEADERSHIP EXPERIENCE

Dev Weekends <i>Software Development Fellowship</i> - Strengthened debugging and system-level problem-solving skills through 300+ algorithmic challenges. - Collaborated in a mentor-led program with 30+ DSA sessions and 12 engineering grind sessions (JavaScript, React, Node.js, system design). - Contributed to open-source projects and capstone development, applying software engineering best practices in real-world scenarios. - Debugged and optimized system-level issues in C/C++ programs, improving runtime efficiency and reliability.	Remote June 2025 - August 2025
Nexium <i>AI & Web Development Intern</i> - Built and deployed 3+ full-stack AI-powered applications with end-to-end functionality (Mental Health Tracker, Quote Generator, Blog Summariser). - Worked with Next.js, Supabase, MongoDB, ShadCN UI, Vercel, and n8n for AI workflows. - Resolved deployment, configuration, and authentication issues to ensure stable production environments.	Remote July 2025

PROJECTS

- Carpooling System**
Developed a C-based carpooling system with ride offering, search, and route matching features. Implemented file handling, user-defined structures, and automated record cleanup for 45+ transport routes. Diagnosed and resolved runtime errors, logical bugs, and file-handling inconsistencies during development.
- Social Media Platform Simulator**
Built a C++ console-based social media simulator with user authentication, posts, stories, likes, comments, and following features. Applied OOP concepts including abstract classes, inheritance, and polymorphism; implemented file handling and password encryption for user data persistence.
- Matrix Calculator**
Developed a matrix calculator in x86 Assembly Language using Irvine32 with menu-driven operations like addition, multiplication, and determinant calculation.
- Advanced Producer-Consumer Kernel Module**
Developed a Linux kernel module implementing a priority-based producer-consumer system using kernel threads, semaphores, and spinlocks. Simulated interrupt handling and deferred work using IRQ and workqueues; enabled real-time configuration via sysfs and debugfs.

Certifications & Training

Google IT Support Professional Certificate (In Progress)
Aspire Institute - Organizational Leadership Program (Aug 2025 - Oct 2025)
Additional Certifications: Google AI Essentials; Deloitte Tech Simulation; C Programming (UC Santa Cruz); Git & GitHub (IBM)

SKILLS, ACTIVITIES & INTERESTS

Technical Skills: Linux, Windows (troubleshooting), TCP/IP, DNS, LAN, OS fundamentals; C/C++, Python, SQL; JavaScript, React; MongoDB; Git
Extracurriculars: Head (Marketing) and Co-Head (Graphic Design) - Robotics and Automation Society; Co-Head (Content) - Developer Student Club; Co-Head (Marketing) - FAST Entrepreneurship Society
Interests: Chess, Music, Graphic Design, Video Editing, Table Tennis, Cycling, Reading, Community Outreach
