Third-year BSCS student at FAST with experience in full-stack development, systems programming, and AI-driven applications.

EDUCATION

National University of Computer and Emerging Sciences (NUCES, FAST) <i>Bachelor of Science in Computer Science</i>	Karachi, Pakistan 2023 - 2027
--	---

WORK & LEADERSHIP EXPERIENCE

Dev Weekends <i>Software Development Fellowship</i>	Remote June 2025 - August 2025
---	--

- Enhanced problem-solving skills by completing 300+ LeetCode problems, improving algorithmic problem-solving and technical interview performance.
- Collaborated in a mentor-led program with 30+ DSA sessions and 12 engineering grind sessions (JavaScript, React, Node.js, system design).
- Contributed to open-source projects and capstone development, applying software engineering best practices in real-world scenarios.

Nexium <i>AI & Web Development Intern</i>	Remote July 2025
---	----------------------------

- Built and deployed 3+ full-stack AI-powered applications with end-to-end functionality (Mental Health Tracker, Quote Generator, Blog Summariser).
- Worked with Next.js, Supabase, MongoDB, ShadCN UI, Vercel, and n8n for AI workflows.
- Improved deployment reliability by implementing CI/CD pipelines, secure authentication, and database integrations.

PROJECTS

-
- AI-Powered Mental Health Tracker**
Developed a full-stack AI-powered mental health tracking application with mood logging and automated insight generation. Implemented Next.js frontend with Supabase authentication, integrated MongoDB for data storage, and configured n8n workflows for AI-based analysis.
 - Carpooling System**
Developed a C-based carpooling system with ride offering, search, and route matching features. Implemented file handling, user-defined structures, and automated record cleanup for 45+ transport routes.
 - Social Media Platform Simulator**
Built a C++ console-based social media simulator with user authentication, posts, stories, likes, comments, and following features.
Applied OOP concepts including abstract classes, inheritance, and polymorphism; implemented file handling and password encryption for user data persistence.
 - Advanced Producer-Consumer Kernel Module**
Developed a Linux kernel module implementing a priority-based producer-consumer system using kernel threads, semaphores, and spinlocks. Simulated interrupt handling and deferred work using IRQ and workqueues; enabled real-time configuration via sysfs and debugfs.

Certifications & Training

Aspire Institute - Organizational Leadership Program (Aug 2025 – Oct 2025)

Google IT Support Professional Certificate (In Progress)

Selected Certifications:

Google AI Essentials; AI Seekho (Google Cloud); Deloitte Technology Simulation; Git & GitHub (IBM)

SKILLS, ACTIVITIES & INTERESTS

Technical Skills: C/C++, Python, SQL, Linux, Bash, Assembly Language, HTML, CSS, JavaScript, React, Next.js, Supabase, MongoDB, ShadCN UI, TensorFlow, Keras, Scikit-learn, NumPy, Pandas, Git/GitHub, Jupyter notebooks

Extracurriculars: Head (Marketing) and Co-Head (Graphic Design) – Robotics and Automation Society; Co-Head (Content) – Developer Student Club; Co-Head (Marketing) – FAST Entrepreneurship Society

Interests: Chess, Music, Graphic Design, Video Editing, Table Tennis, Cycling, Reading, Community Outreach
